Gentlemen:

Subject: Resident Inspection 50-213/88-02 (January 13 - February 29, 1988)

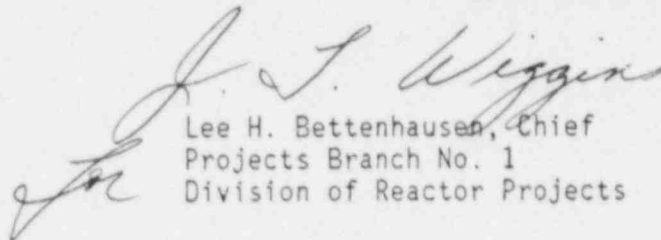

This transmits the findings of the routine NRC inspection conducted by Mr. J. T. Shedlosky and Ms. A. A. Asars of the Haddam Neck Plant. These findings have been discussed with Mr. D. B. Miller of your staff.

No violations were identified during this inspection and no reply to this letter is required. We observed several areas of strong performance of your staff during this inspection period. These areas included Radiological Protection during diving evolutions associated with the Core Support Barrel Thermal Shield repairs, thorough and comprehensive management review of Plant Information Reports on a daily basis, and improved controls over security keycard accountability. These observations are discussed in the enclosed report.

Thank you for your February 9, 1988 letter, as requested by NRC Inspection Report 50-213/87-27, which provided additional information regarding the compromise of safety related, environmentally qualified equipment. This matter will be reviewed during future inspections.

Your cooperation with us is appreciated.

Sincerely, **Original Signed By:**

Lee H. Bettenhausen, Chief
Projects Branch No. 1
Division of Reactor Projects
