

AUG 31 1987

The Frederick C. Smith Clinic
ATTN: Donald M. Miller, M.D.
1040 Delaware Avenue
Marion, OH 43302

Gentlemen:

Enclosed is Amendment No. 37 to your NRC License No. 34-00179-02 in accordance with your request.

Please note that Stanley Hicks, M.D. has not been added to your license as requested. In order to add Dr. Hicks, we will need the following additional information:

1. Documentation to indicate that he has received supervised training that includes eluting technetium-99m from generators systems, measuring and testing the eluate for molybdenum-99 and alumina contamination.
2. Resubmit Supplement B, preceptor statement, Section 3 and indicate the exact number of hours Dr. Hicks received in clinical radioisotope training. NRC requires a minimum of 500 hours be received in clinical training.

Information submitted in response to the above items should state that it is additional information to Mail Control No. 83769 and not a new amendment.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

8801220631 870827
REG3 LIC30
34-00179-02 PDR

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
Cassandra Frazier
