Amend 02

**Subject:** Application for Amendment of Export License

Reference: NRC License No. XB001285  
MDPH Materials License No. 20-00320-21

Dear Ms. Wright:

DuPont has negotiated sale of substantially all its NEN Products business assets to NEN Life Science Products, Inc. Closing is scheduled for about May 30, 1997.

An application to amend broad scope materials license No. 20-00320-7 was submitted to the Massachusetts Department of Public Health on 4/11/97. We are now requesting an amendment to NRC License No. XB001285. There are no substantive changes to this export license except the change in licensee ownership and name. We understand that a check for the amount of \$120 previously submitted on May 21, 1996 is applicable to this reactivated amendment.

In order to facilitate the transfer of ownership we would appreciate if the NRC confirms approval of this application in writing to indicate that the amendment will be effective on the day of Closing. We intend to inform you of the actual day of Closing when we have that information. We have enclosed a marked-up copy of our previous pending amendment application to assist you to identify the changes. If you need any further information or clarification please call the undersigned at 617-350-9111. We thank you for your attention to this matter.

Sincerely yours,

Leonard R. Smith, CHP  
Radiation Protection Officer
