CLIFFORD G. STEFF, DIRECTOR

TO: Midland County Planning Commission
FROM: Midland County Department of County Development
DATE: April 10, 1978
SUBJECT: Land Use in Midland County

Attached to this memo is a preliminary chart on results of a land use survey completed last year. It is being sent to you as a member of the Midland County Planning Commission for your review and comment prior to the April 25 Planning Commission meeting, along with the following proposed analysis and comment. Perhaps the chart, comments and your views may then be adopted as a part of the overall County planning program. Such may then be adopted as an update to Memo Report #8 on existing land use.

The chart is significant on several accounts. It is interesting in itself and in the data it lists. It can be seen that the number of mobile homes, in particular, have increased dramatically during the seven-year interim period from 1969 to 1976. Figures on multi-family units and farmsteads are perhaps rather misleading and may, in fact for our purposes, be ignored. This is not to say they are wrong, though.

However, some of the most interesting data is not on the chart, but must be read between the lines. For instance, while the actual number of trailers has increased by leaps and bounds, the ratio of mobile homes as a percent of total dwelling units has only increased from 13.0% to 18.5%. This leads to speculation on just how "permanent" these homes are. Should the nuclear plant be completed or if construction is halted, would these trailers be moved out? How much impact does "nuke" have in fact? Would (or could) one expect the number of one-family homes to be decreased/increased in the future? Or will the number be stabilized? What effect will this have on population projections? (A comparison of three reliable population studies is enclosed for your review.)

In the absence of records on building activity in the out-county, such data on land use in Midland County is very significant. Many questions can be based on this information that are very crucial to Midland County's future. The comments of Planning Commissioners on this subject will be drawn into a section updating the Midland County General Development Plan and as an element of the planning program.

(This memo was prepared prior to the Planning Commission meeting on March 28 and is being mailed at present to solicit review and comment for the April meeting.)
