Dear Chairwoman Shirley Jackson:

OFFICE OF SECRETARY
DOCKETING & SERVICE
Re Clean-up Standards on decommissioned sites
Clean-up Standards

Please do not set the standard at 30 millirems a year. I realize it would save a lot of \$, but not a lot of lives! The 30 millirems/year works out to 1 in 70 lifetime risk of fatal cancer, far above the EPA's normal limit of 1 in 10,000 lifetime risk of fatal cancer. My dad died of cancer at age 55, much too young. Let's protect our citizens! adopt EPA standards! Sincerely, Dini Schut
