NRC PUBLIC DOCUMENT ROOM

Mr. Samuel Chilk

Secretary

USNRC

Washington, 20555

Dear Mr. Chilk,

In regards to the GENERAL ELECTRIC CO.'s "GETR" reactor at the Vallecitos Nuclear Center (docket# 50-70; show cause hearings), our group would very much like to testify in a limited personal capacity at any such hearings.

We call for the permanent and complete closing of the GETR reactor, due to its location on the fracture zone of a capable fault, within such proximity to urban and suburban areas.

The extra coverage on home insurance in this area which covers quake damage, and which is quite expensive, almost doubling our premium, excludes earthquake-related nuclear damage. If they won't sell us insurance on it, the risk must be fantastic!

We request an appearance (limited personal style) under sect. 2.7)5 (a) of your rules, at all hearing dates on this matter. And we may wish to send more written comment. Could you advise us as to the proper form and procedure for written comment?

Please give us plenty of warning before the hearings so we may prepare and refine our testimony.

Sincerely,

the plutonium players
