U. S. Nuclear Regulatory Commission
Regional Licensing Section
799 Roosevelt Road
Glen Ellyn, Illinois 60177

Re: License #24-18733-01

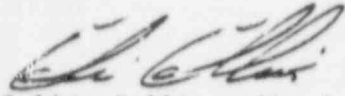

Gentlemen:

We wish to amend the Radioactive Materials License number referenced above to allow moving the Nuclear Medicine Department into a new area. A diagram of the area is attached. There will be no changes in the equipment utilized in the department or in our procedures for handling and using radioactive materials.

Prior to releasing the current Nuclear Medicine Department for controlled use, a thorough radiation survey and wipe test survey will be performed to insure that no radiation sources or contamination exist. The radiation survey will be performed by the nuclear medicine technologist. The low level survey meter will be utilized for the radiation survey. The wipe test will be counted on a Picker Spectroscaler Well System. The wipes will be analyzed by Radiation Consultants of Mid-America (5500 Buena Vista, Shawnee Mission, Kansas). The results of the radiation survey and wipe test will be made available for your review at the next regulatory inspection.

If you have any questions concerning the above request, please do not hesitate to call.

Sincerely,

Colin Collins, Ph. D.
Chief Executive Officer
