Gentlemen:

The staff has initiated the screening of available docketed information related to the SEP program. From our preliminary screening we have determined that the availability of updated plant layouts and equipment location drawings of safety related piping and instrumentation diagrams and safety related electrical schematics in sufficient quantity for our reviewers would significantly enhance the efficiency and effectiveness of our preliminary evaluations. Therefore, we request that you submit six additional copies of the drawings previously docketed and nine copies of drawings or revisions to drawings which have not been previously docketed. The drawings should be of sufficient size to be clearly readable. If you have the drawings on aperture cards in lieu of the above, please provide one set of aperture cards of drawings previously submitted and one set of aperture cards and 3 sets of drawings for drawings not previously docketed. In either case, we request that your submittal include an index to the drawings in the submittal. This information is required by June 30, 1978, to maintain our reviewer schedule. Please call R. Silver (301/492-7403) if you have any questions regarding this request.

Sincerely,

Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Division of Operating Reactors
