

Packet No. 50-29

OCT 30 1975

Yankee Atomic Electric Company  
ATTN: Mr. Robert H. Groce  
Licensing Engineer  
20 Turnpike Road  
Westboro, Massachusetts 01581

Gentlemen:

This refers to your application for a license amendment dated July 14, 1975, including proposed changes to the Technical Specifications appended to License No. DPR-3 for the Yankee Nuclear Power Station (Yankee-Rowe). The proposed changes would allow operation of Yankee-Rowe with Core XII which will include 40 fresh fuel assemblies fabricated by Exxon Nuclear and 36 Gulf United fuel assemblies which have been irradiated during operation with the preceeding Cycle XI.

We have reviewed the description and your evaluation of the new Exxon fuel assemblies in the "Yankee Nuclear Power Station Core XII Performance Analysis" which you submitted with your July 14, 1975 application. We find that we need the additional information identified in the enclosure to this letter to continue our review. The items in the enclosure have been discussed between our staffs on October 29, 1975.

In order to maintain our review schedule, we need your responses to this request by November 10, 1975.

Sincerely,

THIS DOCUMENT CONTAINS  
POOR QUALITY PAGES
