Dear Mr. Oplinger:

General Electric has received the subject license authorizing export of equipment for the Leibstadt reactor in Switzerland.

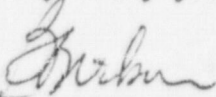

General Electric hereby requests amendment of the license to include an additional intermediate consignee as follows:

The first shipment to this intermediate consignee is scheduled for February 1, 1979.

The shipment will consist of some electrical relays - of nuclear service quality - which will be installed by Gavazzi in Italy in equipment currently being prepared for the Leibstadt nuclear power plant.

Very truly yours,
