Gentlemen:

This refers to the inspection conducted by Mr. J. A. Finn of this office on August 21 and 22, 1978, of activities authorized by NRC Byproduct Material License No. 21-14810-01 and to the discussion of our findings with Mr. James D. Willenberg of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in noncompliance with NRC requirements, as described in the enclosed Appendix A. Note that item 4 is a repeat item in that survey records are still incomplete.
