Dr. Stephen A. McGuire,
Office of Standards Development,
U.S. Nuclear Regulatory Commission,
Washington CD 20555.

U.S.A.

Dear Dr. McGuire.

The State Institute of Radiation Hygiene is the responsible authority for rule making, licensing, inspections etc. in the field of industrial radiography in Denmark.

In reading the proposed rule making of part 34 of NRC Rules and Regulations (published 3/27/78) we have noticed the comments about Appendix A of Part 34 including relevant case histories and the testing of commercially available alarm dosimeters.

Could You please send the appendix A of Part 34 and the recommendations regarding alarm dosimeters.

Thanking You for Your help.

Yours sincerely

Kaare Ulbak

Kaare Ulbak.
