

MATERIALS LICENSE

Amendment No. 08

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

OFFICIAL RECORD COPY

Licensee		In accordance with the letter dated July 10, 1996, 3. License Number 07-20696-01 is amended in its entirety to read as follows:	
1. Ciba Specialty Chemicals Corporation			
2. 205 South James Street Newport, Delaware 19804-2490		4. Expiration Date April 30, 2004	
		5. Docket or Reference No. 030-20734	
6. Byproduct, Source, and/or Special Nuclear Material	7. Chemical and/or Physical Form	8. Maximum Amount that Licensee May Possess at Any One Time Under This License	
A. Cesium 137	A. Sealed sources	A. See Item 9.A.	
9. Authorized use			
A. For possession and use in Kay Ray, Accuray, Ohmart, LFE, Berthold System, Inc., Data Measurement Corp., Flow Measurement Systems, Ronan Engineering or Texas Nuclear devices which have been evaluated and approved for licensing purposes and authorized for distribution under a license issued by the U.S. Nuclear Regulatory Commission or an Agreement State.			

CONDITIONS

10. Licensed material may be used only at the licensee's facilities located at 205 South James Street, Newport, Delaware.
11. Licensed material shall be used by, or under the supervision of, Sam Dougherty or John Burke.
12. The Radiation Safety Officer for this license is John Burke.
13. A. Sealed sources and detector cells containing licensed material shall be tested for leakage and/or contamination at intervals not to exceed six months or at such other intervals as are specified by the certificate of registration referred to in 10 CFR 32.210, not to exceed three years.
B. Notwithstanding Paragraph A of this Condition, sealed sources designed to emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed three months.
C. In the absence of a certificate from a transferor indicating that a leak test has been made within six months prior to the transfer, a sealed source or detector cell received from another person shall not be put into use until tested.

Amendment No. 08

- D. Each sealed source fabricated by the licensee shall be inspected and tested for construction defects, leakage, and contamination prior to any use or transfer as a sealed source.
- E. Sealed sources and detector cells need not be leak tested if:
- (i) they contain only hydrogen-3; or
 - (ii) they contain only a radioactive gas; or
 - (iii) the half-life of the isotope is 30 days or less; or
 - (iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting material; or
 - (v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transfer to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- F. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission and the source or detector cell shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within five days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region I, ATTN: Chief, Nuclear Materials Safety Branch, 475 Allendale Road, King of Prussia, Pennsylvania 19406. The report shall specify the source or detector cell involved, the test results, and corrective action taken.
- G. The licensee is authorized to collect leak test samples for analysis by ICN Dosimetry Service. Alternatively, tests for leakage and/or contamination may be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.
14. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.
15. The licensee shall conduct a physical inventory every six months to account for all sealed sources and devices containing licensed material received and possessed under the license.
16. The licensee shall not acquire licensed material in a sealed source or device unless the source or device has been registered with the U.S. Nuclear Regulatory Commission pursuant to 10 CFR 32.210 or equivalent regulations of an Agreement State.

Amendment No. 08

17. Each gauge shall be tested for the proper operation of the on-off mechanism and indicator, if any, at no longer than six-month intervals or at such longer intervals as specified by the manufacturer and approved by the Commission or an Agreement State in a registration certificate referred to in 10 CFR 32.210.
18. Installation, initial radiation survey, relocation, removal from service, maintenance, and repair of devices containing sealed sources shall be performed by Jesse Lee Sellers or Sam Dougherty or by persons specifically licensed by the Commission or an Agreement State to perform such services. Installation, replacement, and disposal of sealed sources shall be performed only by persons specifically licensed by the Commission or an Agreement State to perform such services.
19. Prior to initial use and after installation, relocation, dismantling, alignment, or any other activity involving the source or removal of the shielding, the licensee shall assure that a radiological survey is performed to determine radiation levels in accessible areas around, above, and below the device with the shutter open. This survey shall be performed only by persons authorized to perform such services by the Commission or an Agreement State.
20. The licensee shall operate each device containing licensed material within the manufacturer's specified temperature and environmental limits such that the shielding and shutter mechanism of the source holder are not compromised.
21. The licensee shall assure that the shutter mechanism of each device is locked in the closed position during periods when a portion of an individual's body may be subject to the direct radiation beam. The licensee shall review and modify as appropriate its "lock-out" procedures whenever a new device is obtained to incorporate the device manufacturer's recommendations.
22. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
23. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Dear Dr. Deming:

This refers to your license amendment request. Enclosed with this letter is the amended license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5093 or 5239, so that we can provide appropriate corrections and answers.

Thank you for your cooperation.

Sincerely,

Re: License # 07-20696-01
Change in Legal Ownership of Ciba Pigments' Newport Plant

Dear Mr. McGrath:

This is a follow-up to our letters of July 10 and August 29, 1996 informing you of a change in the beneficial ownership status of the Newport Plant, and providing you with the 90 change of ownership notification required under our license. Legal transfer of title to the real property and equipment at the Plant is now expected to take place on or about December 31, 1996 (the "Transfer Date") from Ciba-Geigy Corporation, 540 White Plains Road, Tarrytown, NY 10502 to Ciba Specialty Chemicals Corporation, 540 White Plains Road, Tarrytown, NY 10502.

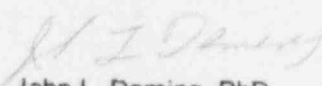

We anticipate that Ciba Specialty Chemicals Corporation, which is currently an affiliate of Ciba-Geigy Corporation, will become independent of Ciba-Geigy Corporation in the first quarter of 1997. It will be comprised of Ciba-Geigy Corporation's former Pigments, Additives, Polymers, Textiles and Dyes, and Chemicals Divisions. In 1995 these businesses had \$1.39 billion in sales in the US.

There will be no change in the individuals who have compliance responsibilities at the Newport Plant as a result of this transfer. I will continue as Vice President, External Affairs, Division Safety, Health and Environment (SH&E), and Operations, Brian L. Steelman as Director, SH&E, and John Burke as the Plant Radiation Safety Officer and primary contact on radiation permits and related issues. However, all personnel will be employed by Ciba Specialty Chemicals Corporation, instead of Ciba-Geigy Corporation.

We now are requesting that the NRC License # 07-20696-01 be transferred to Ciba Specialty Chemicals Corporation as of the Transfer Date.

Please contact John Burke at (302)-996-2957 if there are questions or a need for additional information. Thank you for your assistance with this matter.

Very truly yours,

John L. Deming, PhD
Vice President
Ciba-Geigy Corporation

Re: Change in beneficial ownership status of Ciba Pigments, License # 07-020696-01

Dear Mr. McGrath,

In our letter to the NRC of 7/10/96, we informed you that Ciba-Geigy Corporation has announced its planned merger with Sandoz Corporation and that Ciba-Geigy Corporation will transfer its U.S. specialty chemical businesses and operations, including the Newport Pigments Plant, to a new corporation named Ciba Specialty Chemicals Corporation which will separately run and conduct these specialty chemicals businesses in the future.

I am following up on the phone conversation on 8/29/96 between you and John Burke, our Plant's Radiation Safety Officer, to notify you of Ciba-Geigy Corporation's desire to form Ciba Specialty Chemicals Corporation by September 9. This new corporation would become a subsidiary of a holding company owned by Ciba-Geigy Limited, the parent company of Ciba-Geigy Corporation, by virtue of a stock redemption. Thus, at the end of this transaction, Ciba-Geigy Corporation and Ciba Specialty Chemicals Corporation would be sister corporations; that is to say, the ultimate parent of both corporations would be Ciba-Geigy Limited, a Swiss corporation. As John Burke understood from his conversation with you, the transaction targeted for September 9 will not require any action with respect to the Newport Plant's NRC license.

We anticipate that in early 1997, the parent of Ciba Specialty Chemicals Corporation will become an independent Swiss corporation. Under the proposed transaction, Ciba-Geigy Corporation would initially keep legal title to the real property and equipment at the Newport Plant and would transfer only the beneficial ownership in the plant, so that Ciba Specialty Chemicals Corporation would become the beneficial owner of the plant. Ciba-Geigy Corporation would continue to remain responsible for compliance with our NRC license. Legal title would pass as soon as the NRC license is transferred, and at that time, Ciba Specialty Chemicals Corporation would become legal owner of the plant. This notification is being forwarded to comply with the 90 day change of ownership notification requirements of our license.

If you have any questions, please call Brian Steelman at (302) 992-5712.

Very truly yours,

John L. Deming, PhD
Vice President

Re: License # 07-20696-01
Ciba-Geigy Corporation, Pigments Division, Newport, Delaware Facility:
Merger of Parent Corporation and Subsequent Demerger of Pigments Division

Dear Mr. Costello:

I am writing to inform you of the pending merger of Ciba-Geigy Corporation's parent company, Ciba-Geigy Limited ("Ciba"), a Swiss corporation, with another Swiss corporation, Sandoz Limited ("Sandoz"). The merger in Switzerland may take place as early as late July. The exact date is still not known since the merger still must be approved by both U.S. and European antitrust authorities. The new company will be called Novartis.

Both Ciba and Sandoz have U.S. subsidiaries, which will be merged after the merger in Switzerland. Towards the end of this year or in the first quarter of next year, a group of five businesses, including Ciba's Pigments Division and its Newport facility, will be demerged from Novartis to form a new company which is currently known as "Speciality Chemicals", but which will receive a new name before the demerger takes place.

We informed Duncan White of your office of these facts and asked for his guidance on how and when to file for an amendment to the license for the Newport facility, given the uncertain timing of the actual transfers of ownership and the fact that no name has yet been chosen for the Speciality Chemicals company. He recommended that we write this letter to you answering the questions in Attachment 1 to IN 89-25, Rev. 1, dated December 7, 1994, which will give you the necessary information to give guidance on what further steps will be necessary.

OFFICIAL RECORD COPY

ML 10

123434

REC'D IN LAS.

JUL 15 1996

1. Q: The new name of the licensed organization. If there is no change, the licensee should so state.

A: The Newport facility will have two name changes: first, to Novartis later this summer or early fall; second to a name yet to be chosen later this year.

2. Q: The new licensee contact and telephone number(s) to facilitate communications.

A: The licensee contact will remain the same: John Burke, 302-996-2957.

3. Q: Any changes in personnel having control over licensed activities (e.g., officers of a corporation) and any changes in personnel named in the license such as radiation safety officer, authorized users, or any other persons identified in previous license applications as responsible for radiation safety or use of licensed material. The licensee should include information concerning the qualifications, training, and responsibilities of new individuals.

A: Dr. Jean Schaefflé, who is currently President of the Pigments Division and a vice-president of the corporation, will continue to be the corporate officer with primary responsibility for the Newport facility. The president of Novartis in the United States will be Douglas Watson, who is the current president of Ciba-Geigy Corporation. The president-designate of Speciality Chemicals is Stan Sherman, who is currently Vice-president of Finance of Ciba-Geigy Corporation. There will be no change in the personnel identified in the license applications as responsible for radiation safety or use of licensed material.

4. Q: An indication of whether the transferor will remain in non-licensed business without the license.

A: In the first stage, the Newport facility will become part of the merged company, Novartis, so there is no transferor. In the second (demerger) stage, Novartis will retain an NRC license for its Summit, NJ (Pharmaceuticals Division) facility, see letter from George Stone, Ciba-Geigy Pharmaceuticals Division, re: License # 29-00459-03, to the NRC, Region I office (dated July 1, 1996), while the license for the Newport facility will be transferred to the demerged company. However, no unlicensed nuclear or radioactive business will be conducted by either of the new companies.

5. Q: A complete, clear description of the transaction, including any transfer of stocks or assets, mergers, etc., so that legal counsel is able, when necessary, to differentiate between name changes and changes of ownership.

A: In Switzerland, there will be a merger and consolidation of Ciba and Sandoz into Novartis, and all the assets of both companies will be transferred to Novartis. The exact form of the merger in the United States has not been decided yet, although there will be some form of merger and consolidation of the U.S. subsidiaries of both companies. In the demerger stage, the assets of Speciality Chemicals, including the Newport facility, will be spun off to a new as yet unnamed company. We will inform you of the details as soon as they become known.

6. Q: A complete description of any planned changes in organization, location, facility, equipment, or procedures (i.e., changes in operating or emergency procedures).

A: No change.

7. Q: A detailed description of any changes in the use, possession, location or storage of the licensed materials.

A: No change.

8. Q: Any changes in organization, location, facilities, equipment, procedures, or personnel that would require a license amendment even without the change of ownership.

A: No change.

9. Q: An indication of whether all surveillance items and records (e.g., calibrations, leak tests, surveys, inventories, and accountability requirements) will be current at the time of transfer. A description of the status of all surveillance requirements and records should also be provided.

A: All surveillance items and records will be current. Surveys, inventories, and leak tests will continue to be conducted and records maintained according to our current license requirements.

10 Q: Confirmation that all records concerning the safe and effective decommissioning of the facility, pursuant to 10 CFR 30.35(g), 40.36(f), 70.25(g), and 72.30(d); public dose; and waste disposal by release to sewers, incineration, radioactive material spills, and on-site burials, have been transferred to the new licensee, if licensed activities will continue at the same location or to the NRC for license terminations.

A: All records will remain at the Newport facility, under the control of the same individuals currently responsible for such activities.

11. Q: A description of the status of the facility. Specifically, the presence or absence of contamination should be documented. If contamination is present, will decontamination occur before transfer? If not, does the successor company agree to assume full liability for the decontamination of the facility or site?

A: The only licensed materials at the facility are sealed-source Cesium-137 gauges. According to the license, these gauges are wipe (leak) tested at regular intervals and no leaks have been identified. Therefore, there is no basis for believing that any radioactive contamination exists at the facility. (The facility has been designated as a Superfund site for other contamination and is being remediated under the supervision of EPA).

12. Q: A description of any decontamination plans, including financial assurance arrangements of the transferee, as specified in 10 CFR 30.35, 40.36, and 70.25. This should include information about how the transferee and transferor propose to divide the transferor's assets, and responsibility for any cleanup needed at the time of transfer,

A: There are no decontamination plans and no perceived need for any cleanup of licensed materials.

13. Q: Confirmation that the transferee agrees to abide by all commitments and representations previously made to NRC by the transferor. These include, but are not limited to: maintaining decommissioning records required by 10 CFR 30.35(g); implementing decontamination activities and decommissioning of the site; and completing corrective actions for open inspection items and enforcement actions.

A: The Newport facility confirms that it will continue to abide by all its commitments and representations previously made to the NRC. As stated above, there is no known contamination from licensed material. There are no open inspection items.

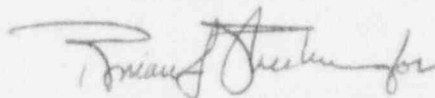

14. Q: Documentation that the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the conditions of transfer; and the transferee is made aware of all open inspections items and its responsibility for possible resulting enforcement actions.

A: There will be no change of control of the licensed material and activities at the facility level and there are no open inspection items.

15. Q: A commitment by the transferee to abide by all constraints, conditions, requirements, representations, and commitments identified in the existing license. If not, the transferee must provide a description of its program, to ensure compliance with the license and regulations.

A: The Newport facility commits to continuing to abide by all terms in the existing license.
