Re: Wheelabrator Gloucester Co., L.P.
Permit License No. 29-28375-01 Renewal Application

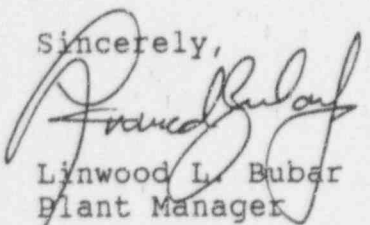

Dear Mr. Shaffer

This letter is in response to your request for additional information on July 27, 1994.

1. Mr. Harry W. Patton is no longer with this company and should not be listed on the renewed license.
2. Until Mr. Rowe completes the necessary training, Mr. Reynolds will be the Radiation Safety Officer (RSO) for the facility. Mr. Rowe is scheduled to complete the 40 hour radiation safety course on November 11, 1994.
3. An outline of training to be provided to each employee which would operate a licensed gauge is attached in Appendix 1.
4. Each employee was provided with information on locking out the licensed gauges. To lock out these gauges, the employees follow the facility's Lock Out/Tag Out procedure.

If you have any further questions concerning the renewal application, please contact Robert Rowe at 609-742-1484.

Sincerely,

Linwood L. Bubar
Plant Manager

License No. 29-28375-01
Docket No. 030-31120
Control No. 119680

Wheelabrator Gloucester Company, L.P.
ATTN: Linwood L. Bubar, Jr.
Plant Manager
600 U.S. Route 130
Westville, New Jersey 08093

Dear Mr. Bubar:

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I office, the Licensing Assistance Section, (610) 337-5093 or 5239, so that we can provide appropriate corrections and answers.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Until your license is terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC, in writing, within 30 days:
 - a. when the Radiation Safety Officer, permanently discontinues performance of duties under the license or has a name change; or
 - b. when the licensee's mailing address changes (no fee is required if the location of byproduct material remains the same).
3. In accordance with 10 CFR 30.36(b) and/or license condition, notify NRC, promptly, in writing, and request termination of the license when you decide to terminate all activities involving materials authorized under the license.

9410200292

4. Request and obtain a license amendment before you:
 - a. change Radiation Safety Officers;
 - b. order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
 - c. add or change the areas of use, or address or addresses of use identified in the license application or on the license; or
 - d. change ownership of your organization.
5. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

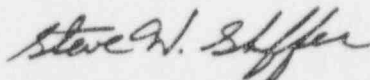

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

You will be periodically inspected by the NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Thank you for your cooperation.

Sincerely,

Steve W. Shaffer
