Hello Ms. Luna,

While working on the license amendment for the subject licensee, I noted that Mr. Botti attested that you have been trained in radiation safety, regulatory issues and emergency procedures in 10 CFR 35.300 (limited to sodium iodide I-131 only) material use which conflicts with information provided in table 3.c. stating that you have been trained in 10 CFR 35.300 material use (all categories). Since NRC license no. 21-16481-01 authorizes the use of 10 CFR 35.300 material, I need another letter or preceptor attestation from Mr. Botti documenting that you have been trained in radiation safety, regulatory issues and emergency procedures in 10 CFR 35.300 (all categories) material use.

Please acknowledge receipt of this email and let me know if you have any questions.

Sincerely,

Magdalena R. Gryglak
