Attachments: [External_Sender] Notification of Cessation of Power Operations

Julie,

NRC has received Entergy's certification of permanent cessation of power operations and permanent removal of fuel from the reactor vessel of Indian Point Nuclear Generating Unit 2. In accordance with term and condition 2 of the NMFS's revised incidental take statement issued on February 9, 2018, the NRC is hereby notifying you of this certification. A copy is attached for your records.

I'd also like to check in with respect to scheduling a teleconference between NRC, NMFS, and Entergy for next week to discuss 2020 Atlantic sturgeon impingement monitoring. We are at a point where the COVID-19 site access restrictions have fully precluded spring monitoring, and there are not enough potential monitoring days in the fall period to meet the T&C 1 requirement of 50 non-consecutive days by the end of 2020. Thus, NRC and NMFS should discuss an appropriate path forward that will ensure continued compliance with the ESA and the biological opinion. Please let me know your and Julie Williams' availability next week (Jun 8-12), and I will set up a conference call line for us.

Thank you!

Briana
