**SUBJECT: CURRENT LIGHTING SOLUTIONS, LLC, EXTENSION OF REVIEW OF
REQUEST FOR NEW EXEMPT DISTRIBUTION LICENSE**

Dear Mr. Hallock:

This letter refers to the email sent by Mr. Buddenbaum, on behalf of Current Lighting Solutions, LLC, dated June 18, 2020, requesting extension of the current new application review period for another 90 days.

The U.S. Nuclear Regulatory Commission (NRC) staff reviewed the request and authorizes the 90 days extension for submitting additional information, listed below, required by Title 10 of the *Code of Federal Regulations* (10 CFR) Section 40.52, "Certain items containing source material; requirements for license to apply or initially transfer."

As required by the regulation, the initial distributor, or licensee, in this case, Current Lighting Solutions, LLC, will be responsible for distribution of its products. Therefore, the identity of the licensee needs to be displayed on the label. Submit the proposed method of labeling or marking each unit, and/or its container with the identification of the initial transferor of the product. Additionally, the proposed method of labeling shall include all radioactive materials, i.e. Kr-85 and thorium, described in your application.

We will continue our review upon receipt of this information. If we do not receive a reply from you within 90 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

Please be aware that upon your request, proprietary information submitted to the NRC may be withheld from public disclosure. To do this, you must follow the procedures in 10 CFR Paragraph 2.390(b) including requesting withholding at the time the information is submitted and complying with the document marking and affidavit requirements set forth in 10 CFR 2.390 (b)(1). If you have any questions, please contact me at (301) 415-5477, or by e-mail at Richard.Struckmeyer@nrc.gov.

Sincerely,
