General Comment

There has been NO response from ANY federal agency in over three years regarding previous concerns about "emergency preparedness" and how that might be connected to safety of nuclear facilities or materials. The date references WITHOUT responding to previous defaults in attending to important requirements for pre-existing facilities are RECKLESS and completely unacceptable. The metrics coded in to this are complete sabotage; we JUST had to spend 35 years of intentionally-coded sabotage of nuclear facilities with disastrous consequences. I know...this time it will be different -- but it will NOT if this is permitted to be promulgated. There USED to be a Presidential Executive Order that was issued on a Valentine's Day that paired emergency medical services and defense operations IN IRAQ; that has been CHANGED on the official electronic record to reflect "veteran's assistance" which is

COMPLETELY inaccurate.

Additionally, why has the Department of Energy been allowed to promulgate completely unsound and unsustainable policies of this sort? I have an electronic copy of an audit from 1981 that has an anniversary 15 days prior to the deadline of this public comment period that STILL has not been addressed and I believe is being leveraged as part of a bioterrorist attack on this country and the world AT THIS TIME. I further suspect this is part of a long-term plan to legitimize and normalize commercialized sex under the auspices of "energy" that is actually about sexual exploitation. NO.

Why have I personally NOT to this day heard back from ANY agency, including the Nuclear Regulatory Commission, about the abuse of derivative scenarios in attempting to financialize policy issues that demand prioritization of safety over speculation and its profit potential? The policy of sabotaging facilities and entities that have a high-level of required oversight and SHOULD be addressed with high standards in order to markdown the asking price during a contrived privatization process post fraudulently imposed bankruptcy is completely unacceptable.
