Dear Ladies & Gentlemen:

I am strongly opposed to storing nuclear waste at the Lea County, New Mexico site because it is very unsafe to do so and it is not economical.

The cost to store nuclear waste is not worth the benefit of electricity which is produced with nuclear power. There should be a transition to renewable energy sources, including wind, solar, ocean and geothermal, as soon as possible.

Taxpayers should not be subsidizing nuclear energy by having to pay for disposal of nuclear waste. For the same reason that most businesses pay waste haulers to get rid of their trash.

Nuclear energy production creates waste that is very expensive to store for very long periods of time, in reality, centuries! and storage is NOT safe! Nuclear energy production must be halted for these reasons.

You should also take steps as soon as possible to clean up unsafe nuclear waste sites at Moab, Utah, near the Colorado River, which supplies water to many millions of people, as well as at Hanford, Washington and at the Bikini Atoll nuclear waste site.

Most sincerely,

Malcolm Blue
