Dear Sir/Madam, As a public health nurse I have seen the devastation that radiation related diseases have made on our population all over New Mexico. We are imploring you not to build another nuclear waste storage area in our state. Please consider another state for this additional area. We are a very poor state and have suffered greatly the consequences of nuclear related weapons and there horrific impacts on our state both health and economy wise. We donot want this to be built and will continue to resist this horror being thrust upon us. Please consider another state for this storage area, and please be responsible with an environmental impact study. We have had enough in New Mexico, and we need a reprieve from further radiation impact on our poor state, Thank you, Dee Finney RN
