

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
WASHINGTON, D.C. 20555-0001

August 5, 2020

LICENSEE: Vistra Operations Company LLC

FACILITY: Comanche Peak Nuclear Power Plant, Unit Nos. 1 and 2

SUBJECT: SUMMARY OF JULY 7, 2020, TELECONFERENCE WITH VISTRA OPERATIONS COMPANY LLC TO DISCUSS A LICENSE AMENDMENT REQUEST REGARDING ONE-TIME REVISION TO TECHNICAL SPECIFICATION 3.7.19, "SAFETY CHILLED WATER" FOR COMANCHE PEAK NUCLEAR POWER PLANT, UNIT NOS. 1 AND 2 (EPID L-2020-LLA-0137)

On July 7, 2020, a Category 1 public teleconference was held between the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Vistra Operations Company LLC (the licensee). The purpose of the meeting was to discuss NRC observations on a license amendment request (LAR) dated June 24, 2020 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML20176A281), to revise Comanche Peak Nuclear Power Plant (Comanche Peak), Unit Nos. 1 and 2) Technical Specification (TS) 3.7.19, "Safety Chilled Water." The LAR proposes to extend the completion time for one safety chilled water train inoperable from 72 hours to 7 days on a one-time basis to allow the replacement of Comanche Peak Unit 2 Safety Chiller 2-06 (Train B) compressor during Unit 2 Cycle 19. The revised TS 3.7.19 includes a regulatory commitment that identifies compensatory measures to be implemented during the extended completion time. The meeting notice and agenda, dated June 25, 2020, are available in ADAMS at Accession No. ML20177A360. A list of attendees is enclosed.

The NRC staff compiled observations regarding the LAR in preparation for the meeting (ADAMS Accession No. ML20184A011). The licensee prepared discussion points on the NRC observations in preparation for the meeting (ADAMS Accession No. ML20190A067). The NRC staff observations were regarding the following topics:

- Equipment Response to Loss of Cooling
- The Safety Chilled Water System Flow Diagram
- Assumptions and Compensatory Measures
- Risk Insights
- The Safety Function Determination Program

During the meeting, the NRC staff and the licensee discussed each of the observations, focusing on the NRC staff understanding of the information provided in the LAR and additional information available to support statements in the LAR. The licensee indicated that it would supplement the application to address the observations, with the exception that the NRC staff and the licensee agreed that no supplemental information was needed on the Safety Function Determination Program.

No members of the public called into the teleconference, thus there were no public comments and no Public Meeting Feedback forms were submitted. No regulatory decisions or commitments were made at the meeting.

Please direct any inquiries to me at 301-415-6256, or by e-mail at Dennis.Galvin@nrc.gov.
