Nuclear Regulatory Commission (VLLW)

RE: Radioactive Waste in Landfills?

Dear ,

To the NRC Commissioners, Staff and VLLW Docket NRC-2020-0065

Needless to say, the VLLW reinterpretation of NRC guidance and rules for managing and disposing of nuclear waste are a threat to me in several ways:

They would allow potentially entire nuclear reactors to be dumped as if not radioactive.

- 1) Threat of exposure to manmade radioactivity;
- 2) threat to democracy and rights of states to provide greater protection than NRC

Keep radioactive waste under control -- Do NOT send it to regular or hazardous waste sites. Rescind the VLLW proposal and continue requiring all handlers of nuclear waste to have a specific radioactive license, not "specific exemptions." No secrets -- If NRC proceeds, against public opposition, it must publicly announce which facilities are applying to take nuclear waste and provide meaningful opportunity for public input and intervention as well as an Environmental Impact Statement.

Do not authorize any person, landfill or facility as "Specific Exempt" as proposed in this VLLW reinterpretation of NRC rules. Redirect NRC resources to better isolation, not release of radioactive wastes. Stop all efforts to let nuclear power waste go to our landfills, incinerators (which cannot destroy radioactivity), recycling streams for consumer goods or any other places that are not licensed for radioactive waste and materials.

Sincerely,
Mr. Allen Hengst
