Nuclear Regulatory Commission (VLLW)

RE: No Radioactive Waste In Our Landfills

Dear ,

To the NRC Commissioners, Staff and VLLW Docket NRC-2020-0065

The VLLW reinterpretation of NRC guidance and rules for managing and disposing of nuclear waste are a threat to me in several ways:

They would allow potentially entire nuclear reactors to be dumped as if not radioactive.

Keep radioactive waste under control--Do NOT send it to regular or hazardous waste sites. Rescind the VLLW proposal and continue requiring all handlers of nuclear waste to have a specific radioactive license, not "specific exemptions."

The VLLW plan is really Very Large Lies about nuclear Waste.

Stop all efforts to let nuclear power waste go to our landfills, incinerators (which cannot destroy radioactivity), recycling streams for consumer goods or any other places that are not licensed for radioactive waste and materials. NRC "intends" for waste to only go to landfills but this "reinterpretation" opens the floodgates to radioactive zippers, frying pans and baby toys which the public has rejected dozens of times over decades.

Sincerely,
coord. Dr. F Taylor
