General Comment

I agree with the coalition of Texas activists, including SEED, Sierra Club, Public Citizen Texas and the Tarrant Coalition for Environmental Awareness, in opposing this plan because of the high risk of transporting the lethal material by rail through major population centers. In addition, the facility is not designed to store high level radioactive waste. Critics say the West Texas facility is at risk of becoming a permanent site for the nation's most deadly nuclear waste because of the dangers of relocating the waste a second time. They are asking concerned residents to comment on the plan.
