SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 50-27789-01

By letter dated August 7, 2020, you informed the U.S. Nuclear Regulatory Commission (NRC) that the licensee wished to terminate NRC radioactive materials license 50-27789-01. The license termination request and supporting documentation stated that radioactive material under NRC license 50-27789-01 will continue to be stored and used under another NRC license.

Based on the statements made and a review of your historical file, the staff concluded that all NRC licensable radioactive material and locations of storage and/or use will continue to be authorized under another NRC license, and that there are no locations that need to be released for unrestricted use. No remediation with respect to NRC regulated material is required.

Please find enclosed Amendment No. 14 to License No. 50-27789-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
Materials Licensing and Decommissioning Branch
