License Amendment Request
Request to Remove Fee Category 3N

Dear Commission:

We would like to request an amendment to our NRC Radioactive Materials License to remove the Fee Category 3N: "Licenses that authorize services for other licenses".

Justification for amendment to the license:

The laboratory accepts a wide range of sample matrices, including (but not limited to) clean drinking water, groundwater, process materials, soil, waste materials, vegetation, flora/fauna, and oil from a variety of customers including commercial and federal clients for analysis of a wide range of potential environmental contaminants. However, the laboratory does not complete any services for other licenses. Unless this Fee Category is somehow associated with another "service" we don't believe there is any reason to continue paying \$18,600.00 per year to have this category associated with this license.

If you have any questions, please feel free to contact me at (314) 787-8206.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael J. Kidenhower".
