Joylynn,

Thank you for your patience in our gathering of the examples you requested. Highlighted below are three examples that Glen Masters (INPO) was thinking of when he spoke up during our August public call. If you need additional information, please let me know.

Best regards,
Jim

Subject: [EXTERNAL] RE: FAQ 20-03 Support and Additional Questions

Jim,
I was mistaken on one point, 2 are cooling water and one is RHR. These are the 3 examples that were clearly bringing the same train back into scope. We would only be able pick these out by the train names. Roy may have additional examples where the train was put back in service with a different name. Thanks Glen

AbbrevLocName	FunctionCode	FunctionTrainName	Reinstated
ANO Unit 1	ROP-MSPI-CWS1	P-4B [In Scope From Q2 2006 To Q2 2011]	P-4B [In Scope From Q3 2016 To Ongoing]
Peach Bottom Unit 2	ROP-MSPI-CWS1	HPSW 2C [In Scope From Q4 2014 To Q4 2015]	HPSW 2C R1 (In scope From Q2 2020 to Ongoing)
Peach Bottom Unit 2	ROP-MSPI-RHR	RHR 2c [In Scope From Q4 2014 To Q4 2015]	RHR 2C R1 (In scope From Q2 2020 to Ongoing)

Subject: FAQ 20-03 Support and Additional Questions

Glen,
In the August 26 ROP call, you said you could think of three examples, all on cooling water systems. When will you be able to forward those? Thank you. Jim
