16.1 Introduction

The McGuire Nuclear Station selected licensee commitment program provides a single location where certain selected operational related commitments are controlled. While this program constitutes [Chapter 16](#) of the McGuire FSAR, the contents of the program are maintained in a separate manual. This manual, "The McGuire Nuclear Station Selected Licensee Commitments Manual", facilitates the administration of this program, including more timely revision and addition of important commitments and user convenience.

The "McGuire Nuclear Station Selected Licensee Commitments Manual" contains commitments to control important plant equipment and operating conditions not controlled elsewhere. Issuance of the manual, as well as subsequent revisions, are done under the approval of the Station Manager.

16.2 Relation To Technical Specifications

The McGuire Nuclear Station Selected Licensee Commitments Manual contains a listing of selected commitments for which McGuire Technical Specification 5.4 (Procedures) requires written procedures to be established, implemented, and maintained.
