Re: RPK-1750, Shipment: 2020-068

Dear Mr. Bowman,

This letter is to advise you the radioactive device as detailed below was received from the White Earth Department of Transportation on 19 November 2020. Sorry for the delay in issuing this letter but I was just provided with the specific source information by Seaman Nuclear yesterday.

Device Manufacturer Source Manufacturer	Device Model # Source Model #	Device Serial # Source Serial #	Isotope	Activity in mCi	Assay Date
Seaman Nuclear Amersham	C-300 RAN.C1	21326 B8512	Ra-226/Be	4.5	6/17/1985

RAM Services, Inc. has taken possession of this device under our state of Wisconsin Radioactive Materials License 071-1234-01, which is attached for your files. The source capsule has been removed from the device and we shall either recycle it through approved vendors or dispose of it at the Waste Control Specialists in Andrews, TX. If the source is disposed of at WCS we shall use the previously provided White Earth Department of Transportation broker agreement letter and indicate White Earth as the waste generator of record. Final disposal volume, activity and other information indicated on the 540/541 waste manifest shall be electronically delivered to you along with the final Waste Control Specialists disposal document so you can finalize your compliance records.

Please retain this record in your permanent files and feel free to contact me with any questions or concerns you may have. I can also be reached via email at [jwiza@ramservicesinc.com](mailto:jwiza@ramservicesinc.com) or my cell phone at 920 323-6993.

Sincerely,

A handwritten signature in black ink that reads "Jerry P. Wiza".

Mr. Bowman:

Good afternoon. It is good to hear from you again.

I have received in separate e-mail messages the following attachments:

- NRC Form 314 (Certificate of Disposition of Materials) dated December 17, 2020; and
- RAM Services, Inc., letter dated December 17, 2020, identifying the transfer/disposal of licensed material

Upon a cursory review of the documents submitted, I have identified one remaining item that is lacking. The submitted NRC Form 314 identifies that a copy of the current Leak Test Report for the portable gauging device is also attached. Though, there was no attachment provided. Please do submit the current Leak Test Report. This is needed to demonstrate that there is no residual radioactivity at your facility. Lacking a current Leak Test Report, you may also have a radiation survey of your facility performed and provide those results for our review. Thank you.
