

## PUBLIC MEETING ANNOUNCEMENT

Title: Introduction to Conceptual Topical Report Implementation and Oversight (TRIO) Process

Date(s) and Time(s): February 04, 2021, 12:30 PM to 03:00 PM

***The time of the meeting is local to the jurisdiction where the meeting is being held.***

Location: Webinar

Category: This is a Category 2 meeting. The public is invited to participate in this meeting by discussing regulatory issues with the Nuclear Regulatory Commission (NRC) at designated points identified on the agenda.

Purpose: To solicit feedback from external stakeholders regarding a conceptual process called TRIO. The TRIO process would leverage the NRC's inspection oversight of fuel vendors to gain efficiency in licensing reviews of the implementation of safety analyses for fuel and reactor system performance based on NRC-approved topical reports. TRIO's aim is to perform detailed reviews of the safety analyses as part of inspection activities instead of licensing reviews. The NRC staff expects this to allow the NRC to exercise a similar level of oversight with a reduction of resources. In addition, the inspections would allow for continuing oversight of the reload safety analysis process rather than an one-time review for each licensee. Overall, TRIO is expected to provide a more efficient and holistic approach to confirm proper implementation of the safety analyses in order to ensure public health and safety.
