North Charleston, SC 29405

SUBJECT: INSIGHT GROUP, LLC, REQUEST FOR ADDITIONAL INFORMATION, MAIL
CONTROL NO. 624214

Dear Mr. Hatch:

This is in reference to your application dated December 16, 2020, requesting a NRC License. In order to continue our review, we need the following additional information:

1. Item 3, Address Where Licensed Materials Will be Used or Possessed, and Item 9, Facilities and Equipment – Your application specifies that the location where material will be stored is under the Agreement State jurisdiction of The State of South Carolina. Therefore, the NRC may recognize and authorize the use of the licensed materials in NRC jurisdiction at temporary jobsites only. No further response is needed for these items at this time.
2. Item 4, Name of Person to Be Contacted About This Application, and Certifying Officer – Your application for a new license was signed by Ms. Kylie Page. The person to be contacted about this application was you, Jason Hatch.
 - a. Please confirm that Mr. Jason Hatch is authorized to make legally binding commitments on behalf of the proposed licensee.
 - b. If Mr. Jason Hatch is not authorized to make legally binding commitments on behalf of the organization, please ensure that a senior manager with such authorization signs any commitments on behalf of the organization, including the response to this request for additional information.
 - c. Please confirm whether Ms. Kylie Page is to be listed as the senior management contact for the license. If yes, please provide contact information for Ms. Kylie Page.
3. Items 5, Radioactive Material – With respect to the requested possession limits, please provide the following information
 - a. The Sealed Source and Device Registry for the Troxler Electronics Laboratories 3400 Series and Model 3430 states the maximum activity per Cs-137 source is 9 mCi (8mCi +/- 10%) and the maximum activity per Am-241 source is 44 mCi (40 mCi +/- 10%). Please confirm you wish to be authorized for a maximum activity

per Cs-137 source of 9 mCi instead of the 8 mCi as listed in your letter dated December 16, 2020 and a maximum activity per Am-241 source of 44 mCi instead of the 40 mCi as listed in your letter dated December 16, 2020.

- b. The Sealed Source and Device Registry for the Troxler Electronics Laboratories Model 4640 states the maximum activity per Cs-137 source is 9 mCi (8mCi +/- 10%). Please confirm you wish to be authorized for a maximum activity per source of 9 mCi for use in Troxler Electronic Laboratories Model 4640 gauges instead of the 8 mCi as listed in your letter dated December 16, 2020.
- c. This license would only authorize possession and use of authorized material at temporary jobsites in NRC jurisdiction. It is not necessary to include your entire inventory of portable gauges normally possessed and stored in Agreement State jurisdiction; therefore, you are not required to include your entire inventory in your requested maximum authorized activity/possession limits. Since this license only authorizes the use of portable gauges in NRC jurisdiction, the maximum inventory should be based on the maximum number of gauges that you expect to use in NRC jurisdiction at one time. Considering this, please either provide an updated request for the maximum number of authorized gauges or confirm the previously submitted maximum possession requests.
- d. Please provide a copy of your South Carolina Agreement State license.

We will continue our review upon receipt of this information. Please reply to my attention at Jonathan.Pfingsten@nrc.gov.

In order to continue prompt review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>. Please be aware that you may request that certain portions of your submittal to NRC be withheld from public disclosure as proprietary information. To do this, you must execute an affidavit as specified in 10 CFR 2.390. You must list all portions that you wish to be held proprietary, along with your reasoning as to why that is appropriate. While it is allowable, please refrain from submitting proprietary information in support of a license unless necessary. Keep in mind that all NRC licenses are considered to be in the public domain, and therefore may be viewed by any member of the public who requests to see them.

If you have any questions regarding this request for additional information, please contact me at (610) 337-5170 or via electronic mail at Jonathan.Pfingsten@nrc.gov.

Thank you for your cooperation.

Sincerely,

**Jonathan B.
Pfingsten**
