2. Modify Regulations – remove reference to or requirement of reliance on credit ratings and substitute a standard of credit-worthiness that “each respective agency shall determine as appropriate for such regulations”
3. Transmit a report to Congress containing a description of modifications made to its regulations

The NRC's Rulemaking - Alternatives to the Use of Credit Ratings

- ❑ Staff's initial approach was to remove use of credit rating criteria and instead rely on existing financial test criteria
- ❑ October 30, 2019, public meeting comments highlighted challenges with the initial approach
 - ❑ Could negatively affect some licensees' ability to utilize guarantee mechanisms
- ❑ Staff conducted additional analysis and outreach to other federal agencies
- ❑ Based on results of analysis and feedback, staff recommended and received Commission approval to conduct an ANPR to solicit public input.

Public Comments and Questions

Two ways to comment or ask a question –
by phone or WebEx Chat.

- To comment over the phone, press *1 and wait for the operator's prompts.
 - Please begin by introducing yourself, speak clearly for an accurate transcript.
- Or, send a short comment or question via WebEx Chat to “**All Panelists**” and the facilitator will read it aloud.

ANPR Question 1

Question 1) Are there licensees that meet the current credit rating-based financial test for a guarantee that would not be able to meet the alternate working capital and liability-based financial tests currently presented in 10 CFR part 30 appendices?

Would such licensees be able to meet the decommissioning funding assurance requirements using one or more other funding assurance methods allowed for by regulation (i.e., prepayment, surety bond, insurance, external sinking fund)?

ANPR Question 2

Question 2) Modified or new financial metrics for assessing creditworthiness: Please provide your views on financial statement metrics or other quantifiable financial characteristics that could be reported by licensees to assess a licensee's creditworthiness and hence, its ability to use a parent company guarantee or self-guarantee mechanism for providing reasonable assurance that decommissioning funding will be available (see § 50.75, "Reporting and recordkeeping for decommissioning planning"). Suggested metrics should differ from the current working capital and liability-based metrics currently presented in 10 CFR part 30 appendices cited in the Background to this notice and include pass or fail criteria limits.

ANPR Question 3

Question 3) Independent agency determination: Please provide your views on the NRC performing an independent risk-informed, performance-based determination of a licensees' credit-worthiness. The NRC would seek to determine the licensee's risk of default based on its review of financial data while providing some degree of flexibility on the part of licensees as to the type of financial data submitted. This could include evaluation of financial data available from the licensee, open-sources, and from third parties, including credit ratings.

ANPR Question 4

Question 4) Should the NRC consider other alternative financial test criteria not presented above to assess an applicant's or licensee's use of a guarantee to provide reasonable assurance of funds for decommissioning?

If yes, please provide details of the alternative criteria and the financial data needed for its use.
