Subject: *2020 Verification Monitoring Report for Gunnison, Colorado, Processing Site*

To Whom It May Concern:

This Verification Monitoring Report (VMR) documents the results of the 2020 risk-informed groundwater and surface water sampling event for the Gunnison, Colorado, Processing Site (Gunnison site). The COVID-19 pandemic necessitated a risk-informed sampling approach in 2020. In 2015, the U.S. Nuclear Regulatory Commission accepted the Groundwater Compliance Action Plan (GCAP), which documented the selection of the natural flushing compliance strategy with continued groundwater and surface water monitoring and institutional controls. Previous VMRs and the GCAP for the Gunnison site are available on the U.S. Department of Energy Office of Legacy Management website at <https://www.lm.doe.gov/Gunnison/Processing/Documents.aspx>. Sampling data is available on the Geospatial Environmental Management System (GEMS) website at <https://gems.lm.doe.gov/#site=GUP>.

Please contact me at (970) 248-6016 or Jalena.Dayvault@lm.doe.gov, if you have any questions. Please address any correspondence to:
