Title: Presubmittal Teleconference with Entergy Nuclear Operations, Inc. on a Request for One-Time Deferral from 90-day American Society of Mechanical Engineers (ASME) Code Case N-513-4 Inspection for Indian Point Nuclear Generating Unit No. 3.

Date(s) and Time(s): February 08, 2021, 02:00 PM to 03:00 PM

***The time of the meeting is local to the jurisdiction where the meeting is being held.***

Location: Teleconference

Category: This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.

Purpose: The purpose of this teleconference is to discuss Entergy Nuclear Operations, Inc.'s (Entergy) proposed alternative request for a one-time deferral of a 90-day follow-up inspection required by ASME Code Case N-513-4 (Code Case) for Indian Point Unit No. 3 (Indian Point 3). The Code Case is currently being applied to a through-wall leak in the Indian Point 3 service water system piping. The proposed alternative request would allow for the inspection to be performed within 150 days from detection of the leak rather than the current Code Case requirement of 90 days.
