PUBLIC SUBMISSION

Docket: NRC-2020-0277

Notice of Intent to Conduct Scoping Process and Prepare Environmental Impact Statement NextEra Energy Point Beach, LLC; Point Beach Nuclear Plant, Unit Nos. 1 and 2

Comment On: NRC-2020-0277-0001

Notice of Intent To Conduct Scoping Process and Prepare Environmental Impact Statement; NextEra Energy Point Beach, LLC, Point Beach Nuclear Plant, Units 1 and 2

Document: NRC-2020-0277-DRAFT-0024

Comment on FR Doc # 2021-02001

Submitter Information

Name: Pam Nelson

General Comment

Embrittled containers are a huge problem, besides the fact that storage of more waste is more and more hazardous in the cumulative aspects. I adamantly oppose future use of nuclear power at this site. Two decades of additional operations at Point Beach, on top of what NRC has already approved, would mean yet another 800 metric tons, or more, of additional high-level radioactive waste that would be generated, for which we still have no safe, sound solution, after 64 years of commercial/civilian nuclear power (and high-level radioactive waste generation) in this country. This additional 800 metric tons of irradiated nuclear fuel would represent a catastrophic risk in and of itself, to public health, safety, security, and the environment, and would be a curse on all future generations. High-level radioactive waste remains hazardous and deadly for more than a million years. 20 years of electricity generation at Point Beach is not worth the more than a million years of hazard associated with the high-level radioactive waste that would be generated. This is especially outrageous, when clean, safe, secure, affordable, and reliable renewables, such as wind and solar, combined with efficiency and storage, can readily displace Point Beach in terms of electricity supply
