General Comment

The point beach plants are aged and unsafe much like oil pipelines under the straits of Mackinack and in the Kalamazoo River at Talmadge Creek and the Palisades nuclear power plant in Michigan — disasters waiting to happen which (when they do occur) will have no remediable solution no matter what kind of money is made available. Environmentally safe means of generating power now exist which cost far less and thus there is little reason to continue operating these dinosaurs and subsidizing unsafe power sources.
