

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
REGION I
2100 RENAISSANCE BLVD.
KING OF PRUSSIA, PA 19406-2713

February 23, 2021

Janette Edwards
Vice President of Operations
The Hospital of Central Connecticut
100 Grand Street
New Britain, CT 06050

SUBJECT: THE HOSPITAL OF CENTRAL CONNECTICUT, CONSENT TO INDIRECT
LICENSE TRANSFER, MAIL CONTROL NO. 623269

Dear Ms. Edwards:

By letter dated September 22, 2020 (ADAMS accession number ML20276A147), The Hospital of Central Connecticut submitted to the U.S. Nuclear Regulatory Commission (NRC) a request for written consent to an indirect license transfer of NRC Materials License No. 06-02388-01. Based on the information provided, the indirect license transfer resulted from a transaction between The Hospital of Central Connecticut (HOCC) and Hartford Healthcare Corporation (HHC), which occurred in 2006. Under the terms of the transaction, HOCC became a wholly owned subsidiary of HHC. We further understand that this transfer did not result in any changes to the licensee name, licensed materials, persons using the licensed material, location of use, or persons responsible for the radiation safety program.

This request was effectively for post-hoc approval of an indirect license transfer that occurred in 2006, without receiving written consent from the Commission as required by 10 CFR 30.34(b)(1). Please note that any future transfers of control must receive prior written consent from the Commission in accordance with 10 CFR 30.34(b)(1).

As more fully detailed in the enclosed Safety Evaluation Report, which documents the NRC staff's review of the request, and in accordance with 10 CFR 30.34, the NRC consents to the transfer. Please note that since this transaction occurred in 2006, no other action is required. If you have any questions regarding this letter, please contact Janice Nguyen at (610) 337-5006 or via electronic mail at janice.nguyen@nrc.gov.

Future changes in the licensee's name, licensed use, licensed materials, licensed location, persons responsible for licensed material, or other changes to the corporate organizational structure require submission of a request to amend the license or a request to transfer the license. NRC approval must be received prior to implementation of the proposed change.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation in this matter.

Sincerely,

Janice Nguyen, Senior Health Physicist
Medical and Licensing Assistance Branch
Division of Nuclear Materials Safety
Region I
