## General Comment

I feel that renewing the license for Point Beach Nuclear reactors is dangerous.

\* Long term storage on site of Nuclear Waste has and will continue to be a long term Problem.

\* Variations of lake levels could be suspect risk for the plant and waste storage

\* the risk of tying energy production of this facility when newer technologies could be coming on line in the very near future creating an albatros senario for rate payers

\*risk to human and fish/fawna during fuel rod exchange for refueling reactor.

I do thing it is necessary for current energy needs to continue operation but 20 years is way too long.
