## General Comment

Pailsades and Big Rock are particularly touchy Nuclear reactors whose decommissioning needs to be done by truly competent people with adequate liability to cover all eventualities. Keep looking but I assume if will inevitably devolve to the federal government. The properties are prime Great Lakes waterfrontt and need to be returned to the public and not just sold off to developers.

Ladislav Hanka

I have worked as an environmental monitor and how that the records of a power plant and its many contractors are rarely accurate. These data are typically not to be trusted.
