General Comment

Local storage of eternally toxic nuclear waste is an unacceptable risk.

Science indicates reactor steel gets brittle with exposure to fission. This risks a Fukushima or Chernobyl right here in river city.

Close Palisades.

Move all waste to a long term disposal facility (if you can find one...), but do not add to the time bomb that is currently at Palisades.

If you foolishly approve this transfer, require prior posting of funds dedicated to eventual clean-up of the site.
