RE: Amendment Request to 24-32264-01

Magdalena,

I am working on SSM Health Cardinal Glennon Children's Hospital NRC renewal application. The hospital's Blood Bank Irradiator is in process to be removed using the Idaho National Laboratory (INL) who works closely with the Los Alamos National Laboratory Off-site Source Recovery Program (LANL-OSRP). Once the date of removal date is given, I will convey to you.

I discussed with Mr. Orlikowski who stated that once the blood bank Irradiator is removed, it will not have to be in the renewal application.

I look forward working with you again.

Thank you,

Wallace Fuhrman, BA, RSO, CNMT
