Subject: RE: Incoming License Termination Action
Date: Wednesday, March 24, 2021 6:04:31 AM
Attachments: [image001.png](#)

Lyn/Becky/Amy,

We are looking for this action that was forwarded by Randy on March 11. I don't see it listed in WBL or ADAMS yet. Is this in the incoming licensing process anywhere?

Thanks,
Betsy

Subject: [External_Sender] RE: RE: Lane Construction Radioactive Material License

Mr. Ragland,

Please see the attached NRC Form 314 to officially request termination for Lane's Radioactive Material License (06-06284-02) effective 3/23/2021. I will forward the disposal letter from Troxler Labs immediately upon receipt. Please let me know if you have any questions.

Sincerely,

Fred White | Corporate Quality Manager
The Lane Construction Corporation

Mr. White,

The 50% refund is a policy of the fees department so I would rather they confirm that.

With respect to your license termination request, the sooner you send that in the better. It will get into our system and you can send confirmation of the disposal later.

Also, expedited processing cannot be counted on.

Again, we normally need 90 days for this type of action.

Mr. Ragland,

Thank you for the information. Our last gauge will be shipped to Troxler on the 23rd of this month for disposal. I will submit the paperwork as soon as Troxler confirms receipt of the device and request the expedited process. That will allow us to receive back 50% of the license fee since the request was submitted before March 30th correct?

Mr. White,

The link to NRC Form 314 is listed near the bottom of this email.

Complete that and submit it to, I guess me, and request license termination.

Also, because we have committed to processing license amendments including license terminations within 90 days, you will need to request an expedited processing of your requested license termination.

I would suggest putting the request in writing and submit via email to Mr. Ragland. This would probably be the quickest way since we are all still working remotely due to COVID. I have copied Mr. Ragland on this email.

Hello Kelly,

We will be sending our last nuclear gauge to Troxler on 3/23 for disposal and would like to cancel our Corporate Radioactive Material license before the March 31st deadline. What exactly would you need to make sure that process is complete?

Thanks

Good afternoon Mr. White,

The information provided by Mr. Ragland is correct. If a termination request is received between Oct. 1 and March 31 of any given fiscal year, your fee would be 50% prorated. If the termination comes in between Apr. 1 and Sept. 30, the fee is due in full. I hope this helps!

Thanks,

Kelly Riner

Mr. White,

If you cancel before March 31, 2020, you could have gotten 50% of your fees back. I believe your fees run through September 2020, and are due again in October 2020. However, I am part of the technical staff and they like keeping the technical staff separated from fee conversations. You can contact the individual listed below to confirm that information.

With regard to license termination, you can send a letter to NRC by mail or email to a staff member (just confirm that received it), and make you provide the information required my NRC Form 314.

<https://www.nrc.gov/reading-rm/doc-collections/forms/nrc314info.html>

You would make sure you do this before the end of the license fiscal year (which I believe is September 30, 2020. Then we would just process your license termination.

Hello Randy,

I have a couple quick questions about our attached corporate license. If we cancel it, when will the annual fee stop and what is the process to do so?

Thanks

Mr. White,

Do you want me to decrease your authorized possession limit to one single Troxler Model 3440 gauge, or do you want some flexibility if you decide to purchase additional gauges.

Either way is OK, because there are no additional charges for license amendments.
