**Subject:** [External\_Sender] RE: ACTION - Request for Comments on the Proposed Issuance of Amendment to Technical Specifications for Fermi Nuclear Power Plant, Unit 2 (EPID L-2020-LLA-0127)

Mr. Arora,

This is in response to your request for comments regarding the Fermi 2 license amendment request (ADAMS Accession No. ML20157A169).

My staff have reviewed the amendment request and relevant NRC subject correspondence. We have no additional comments or questions.

Thank you

T.R. Wentworth II, Manager

**CAUTION: This is an External email. Please send suspicious emails to [abuse@michigan.gov](mailto:abuse@michigan.gov)**

Dear Mr. Wentworth,

The U.S. Nuclear Regulatory Commission (NRC) plans to issue an amendment to Fermi Nuclear Power Plant, Unit 2 (Fermi 2) technical specifications (TS) in response to DTE Electric Company's proposed amendment request referenced below.

DTE's amendment request, dated June 5, 2020, is publicly available in the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession No. ML20157A169.

It appears that a copy of the amendment request was also cc'd by DTE to Michigan Department of Environment, Great Lakes, and Energy.

The proposed amendment would revise the Fermi 2 Technical Specifications to: Adopt TSTF-563, "Revise Instrument Testing Definitions to Incorporate the Surveillance Frequency Control Program"

On August 25, 2020, the NRC had issued a proposed finding that the amendment involves no significant hazards consideration in the *Federal Register* (Reference: Vol. 85, No. 165, 52373).

Please let me know if the Michigan State has any comments on this proposed amendment by April 2, 2021.

Thank you for your time.

Regards,

SURINDER ARORA, PE  
Project Manager, Fermi 2  
US NUCLEAR REGULATORY COMMISSION
