

March 15, 2021

Title: Pre-Application Teleconference with Energy Northwest to Discuss a Planned License Amendment Request for Columbia Generating Station (EPID L-2021-LRM-0030).

Date(s) and Time(s): March 31, 2021, 01:00 PM to 02:00 PM

***The time of the meeting is local to the jurisdiction where the meeting is being held.***

Location: Teleconference

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this teleconference between Energy Northwest (the licensee) and the U.S. Nuclear Regulatory Commission (NRC) staff, is to discuss a planned license amendment request (LAR) regarding deletion of certain license conditions relating to license renewal commitments for the Columbia Generating Station. This operating license (OL) change clarifies that license renewal commitments may be changed via 10 CFR 50.59 since the details of the commitments have been relocated from the OL license conditions to the license renewal updated final safety analysis supplement.
