Subject: [External_Sender] FW: resending unable to open link - Louisiana 2021 Draft IMPEP Report

Kathy,

After reviewing the 2021 IMPEP Draft Report, I see one sentence I was hoping we could make a little more clear for the everyone. On page 7, Section 3.3.b, it states:

Inspectors are accompanied by a member of management twice per year, which is more than the NRC's required once per year frequency. With one exception, supervisory accompaniments were performed annually for all qualified inspectors for each year of the review period. The team identified that during this review period, one qualified inspector was not accompanied. This individual is a fully qualified inspector who trains new staff, performs inspector accompaniments, and leads team inspections. The lack of an inspector accompaniment for this one individual was an oversight by Louisiana.

The highlighted sentence should be changed to reflect that it was not just a qualified inspector that was not accompanied. It was a technical senior staff member that does not typically perform normal inspections. As we have discussed recently concerning this sentence, either of the two sentences below seem to capture this more effectively.

The team identified that during this review period, one technical staff member was not accompanied.

The team identified that during this review period, a senior staff member was not accompanied.

Please consider this change in the report. I appreciate your time and effort you have given to me and the Louisiana Radiation Team.

Sincerely,

Karen Burgard
