RE: Cimarron Facility
Docket No: 70-0925
License No: SNM-928
Amendment Request
Radiation Safety Officer

Dear Mr. Austin:

In response to management assignments, effective January 1, 1995, Ms. Karen Morgan will become the Radiation Safety Officer (RSO) for the facility. The present RSO, Mr. Terry Moore, will devote full time to the decommissioning activities at the company's Cushing, Oklahoma Facility.

Ms. Morgan had previously performed the RSO duties at Cimarron on an interim basis.

Additional to this RSO change, Cimarron has contracted with Chase Environmental Group to provide supplemental radiation program oversight by having Mr. Harry Newman, CHP or his designee, to be on-site twice monthly, or as needed, to review progress, records and provide expert analysis of activities.

This change in RSO and CHP review maintains the high quality of the Facility's radiation protection program.

If you have any questions concerning this change please contact me at your earliest convenience at (405)270-2623.

Sincerely,

J. C. Stauter,
Vice-President, Cimarron Corporation
