PG&E Letter HBL-21-006

ATTN: REIRS Project Manager
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

10 CFR 20.2206

Docket No. 50-133, OL-DPR-7
Humboldt Bay Power Plant, Unit 3
Annual Report of Occupational Radiation Exposure for Year 2020

REIRS Project Manager:

Based on the guidance in 10 CFR 20.1502, Pacific Gas and Electric Company (PG&E) performed an a priori dose assessment and determined that individual monitoring at Humboldt Bay Power Plant (HBPP) during calendar year 2020 was no longer required. With the completion of all decommissioning demolition activities, routine surveys ceased Q4 of 2019 and were not performed in 2020. Monitoring at the perimeter of the decommissioning area continued through Q1 of 2020. The monitoring validates that the assumptions used in the dose assessment were acceptable. Individual monitoring is no longer required at HBPP. Therefore, no report was filed for calendar year 2020 in accordance with 10 CFR 20.2206(c).

PG&E makes no new or revised regulatory commitments (as defined by NEI 99-04) in this letter.

If you have any questions, please contact William H. Barley, Radiation Protection Manager, at (707) 444-0856.

Sincerely,

Eric Nelson
