Re: RATS IDs 2006-1 and 2006-2

Dear Ms. Beardsley,

During Alabama's recent periodic meeting conducted under IMPEP, it was brought to our attention by Monica Ford that there appeared to be outstanding comments as it pertained to RATS IDs 2006-1 and 2006-2. This refers to NRC comments in the letter dated September 18, 2013 regarding our Rules 420-3-26-.02 and 420-3-26-.07. Our review of this matter found that these two sets of rules were part of the rule packet submitted to NRC with the cover letter dated October 14, 2014. Although RATS IDs 2006-1 and 2006-2 were not referenced as part of this packet, it is my opinion that the rules were amended at that time to address the 2013 NRC comments in a manner that would not conflict with Alabama law. The current rules can be found on our website at: <https://www.alabamapublichealth.gov/radiation/chapter-rules.html>

Revisions of our Rules 420-3-26-.02, 420-3-26-.07 and 420-3-26-.15 were recently submitted for NRC review addressing RATS IDs 2007-3, 2018-1, 2018-2, 2018-3, 2019-1, 2019-2, 2020-2 and 2020-3. If, during your review, you identify an item in RATS IDs 2006-1 or 2006-2 that we do not adequately address in our Rule 420-3-26-.02 or 420-3-26-.07, please provide comments for us to consider.

If you have any questions or comments, please feel free to contact me at 334-290-6245 or email me at david.turberville@adph.state.al.us.

Sincerely,

David A. Turberville, Director
Office of Radiation Control
