RE: Request for reduction of fees

Due to the financial impact Desert NDT, LLC dba Shawcor has suffered from the COVID pandemic, we were forced to find areas where we could cut costs. One of the solutions to reduce expenses was to terminate any licenses that were not vital to our current operations. On August 24, 2020 Casey Glassey submitted a request for termination of our NRC License, and applied for Reciprocity in order to maintain our commitment to costumers we have within NRC jurisdiction.

Unfortunately, work continued to be pushed back and in some cases canceled all together. Due to the impact on our industry caused by government restrictions related to the pandemic, our revenue was reduced to less than 50% of our annual projections. For this reason, I would like to request a reduction in the fees associated with the termination of our license.

Please see attached Financial Statement showing our 2019 and 2020 Planed and Actual Revenues.

Sincerely,
