U.S. Nuclear Regulatory Commission
TMI-1 ISFSI DQAP 10 CFR 72.140
Docket Nos. 50-289 and 72-077
June 15, 2021
Page 2

In accordance with 10 CFR, "Part 72 – Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste," 10 CFR 72.140, "Quality assurance requirements" paragraph (d), "Previously-approved programs," Exelon Generation Company, LLC (EGC) is notifying the U.S. Nuclear Regulatory Commission (NRC) of the intent to apply the previously approved EGC Decommissioning Quality Assurance Program (DQAP) to Independent Spent Fuel Storage Installation (ISFSI) activities at the Three Mile Island Nuclear Station, Unit 1 (TMI-1).

The DQAP, which satisfies the requirements of 10 CFR 50 Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Processing Plants," 10 CFR 71 Subpart H, "Quality Assurance for Packaging and Transportation of Radioactive Material," and 10 CFR 72 Subpart G, "Quality Assurance for Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste" is maintained in the EGC DQAP (NO-DC-10), Revision 1.

In Reference 1, as supplemented by Reference 2, EGC requested NRC review and approval of the EGC DQAP, Revision 0, for Oyster Creek Nuclear Station. In Reference 3, the NRC transmitted approval for the proposed EGC DQAP for Oyster Creek Nuclear Station. The DQAP was revised on September 19, 2019, Revision 1, to include TMI site specific information. The DQAP (NO-DC-10), Revision 1, was reviewed in accordance with 10 CFR 50.54, "Conditions of licenses," and found not to reduce EGC's commitments previously approved by the NRC. Reference 4 submitted the DQAP (NO-DC-10), Revision 1, to the NRC for post implementation review.

Respectfully,

A handwritten signature in black ink, appearing to read "Michael P. Gallagher", with a long horizontal flourish extending to the right.

Michael P. Gallagher
Vice President, Licensing Renewal & Decommissioning
